EXPERIENCE

Web Developer

XOXNO

📅 Apr 2022 – Jan 2025

📍 Remote

- Fully developed DeFi Platform & NFT Marketplace
- Technology: React, Next.js, Tailwind, Radix UI, MultiversX, Structured Data, Next Intl (i18n), React Email, Chart.js, React Hook Form, SWR, REST APIs, Virtualization
- Clean code: As the solo web developer behind XOXNO, I optimized writing scalable, composable and clean React components
- Maths Focus: As a secure DeFi Protocol with more than 2M USD TVL, I am used to writing logic heavy flows. So apart from front-end development, I also like solving hard problems

Frontend Developer

MULTA MEDIO

📅 Apr 2020 – Oct 2020

📍 Würzburg, Germany

- Evaluated the Usability of their internal E-Learning Software, then implemented the changes technically
- After the 6-week Usability internship, helped migrating LOTTO Baden-Württemberg to Microservice Architecture
- From Mar 2021 - Apr 2021, worked as a student worker to migrate LOTTO Bayern to a novel architecture as well

Web Developer

shopkonstrukt

📅 Nov 2021 – Mar 2022

📍 Würzburg, Germany

- Worked with Plentymarkets to develop a cross-device cart persistence system
- Designed a christmas discount landing page in Wordpress and an embedded earnings calculator widget in Next.js

EDUCATION

B.Sc. Human-Computer-Interaction

Julius-Maximilians-Universität

📅 2017 – 2021

📍 Würzburg

- Focus on measuring and evaluating Usability. Grade: 1.5
- Thesis: Entwurf, Entwicklung und Evaluation eines NutzerInnen-Onboarding-Systems für die Texterkennungssoftware OCR4all. Grade: 1.0

Abitur

Dietrich-Bonhoeffer-Gymnasium

📅 2013 – 2017

📍 Wertheim

- Grade: 1.6

SKILLS

Next.js, React, Typescript
Tailwind, Radix UI, UI/UX
Structured Data, SEO
Communication, Reliability

PROJECTS

XOXNO [↗](#)

- DeFi Platform [↗](#) and NFT Marketplace [↗](#) on the MultiversX blockchain
- Highlight: Open-source Lending Protocol [↗](#) that allows you to Lend, Borrow, Long, Short and execute advanced strategies on-chain

ZonTix [↗](#)

- Event & Ticketing Platform by XOXNO, specialised for the Web2 Market
- Highlight: Allows organizers to log in with their Google Account, while using blockchain technology under the hood

Seediboard [↗](#)

- Leaderboard archive for Seedify campaigns
- Highlight: Storing leaderboards in PostgreSQL allows for on-the-fly aggregation, like showing all leaderboards a user participated in

Montescout [↗](#)

- Platform to list and discover Montenegrin real estate
- Highlight: Indexing based on zip code allows filtering by town, municipality, and more

Thesis [↗](#)

- Documenting a full usability evaluation cycle followed by technical implementation

Regina Pöhländ [↗](#)

- Website for my artist mother

Boris Pöhländ [↗](#)

- My personal website

Other side projects

- WEB3DEV Landing Page [↗](#)
- WEB3DEV Crypto Landing Page [↗](#)
- My Montescout [↗](#)
- Stack Guru [↗](#)
- Next Dev Agency [↗](#)
